

Integrated Liner Technologies
The world's leading manufacturer of caps and septa.

ILT Cap-Mat

The ILT CAP-MAT is ideal for use with glass insert and the only sealing system on the Market that has a complete surface barrier across each of the sealing plugs. While other mats rely on a spray-on coating, ILT CAP-MATS utilize a PTFE film to provide a consistent, inert surface barrier and an airtight seal on each insert. The barrier film also guarantees the sample integrity by preventing cross contamination.

The Well-Style provides a thin .025" membrane for repetitive sampling using GC syringes and robotic systems. The Solid Style is excellent for long-term storage of samples. The Well-Style is also available in a pre-slit version. A silicone only style is also available .

| Part Number | Description | QTY |
|-------------|-----------------------------|-----|
| 096-08-9099 | Round, plug with PTFE | 5 |
| 096-08-8892 | Round, plug silicone only | 5 |
| 096-08-8891 | Round, PTFE/Silicone - slit | 5 |
| 096-08-8292 | Round, PTFE/Silicone | 5 |
