

Integrated Liner Technologies
The world's leading manufacturer of caps and septa.

LC Clean®

Clean. Clear. Bonded.

ILT's LC Clean® product not only meets today's requirements for LC, HPLC and LCMS but exceeds them. LC Clean® is manufactured using a color free ultra clean silicone material faced with a clear PTFE film.

Our products undergo HPLC and LCMS testing using exclusive test methods and protocols developed in cooperation with leading chromatographers and scientists. Testing and certification begins with the raw material and continues throughout the manufacturing process. A test certificate is issued and the actual chromatogram provided to our customers for all caps manufactured to verify that the high level of cleanliness is maintained throughout process.

Part Numbers	Description
009-13-8044	Blue 9mm screw cap with bonded clear LC CLEAN® septa
009-13-8046	Gray 9mm screw cap with bonded PRESLIT clear LC CLEAN® septa
