

Integrated Liner Technologies

The world's leading manufacturer of caps and septa.

Seal-Mat 4000™

ILT Seal-Mat 4000™ is a new and innovative well plate cover using a premium grade pure silicone and a new technologically advanced PTFE film layer. The PTFE film provides 100% complete coverage of the Seal-Mat 4000™ for increased chemical resistance where inert material contact with the sample is critical. All Seal-Mat 4000™ covers are manufactured with our unique low bleed silicone providing the highest level of cleanliness for the user.

Features of Seal-Mat 4000™

- Designed to fit most standard 96 well plates
- Available in 96 round and square well design
- Resistant to coring and tearing
- Excellent resealability
- Autoclavable
- Available in Pre-slit for easier needle penetration
